

## Introducing the new – and improved – Aprima Portal

The Aprima Patient Portal has a brand new look and feel, along with some valuable new functionality. You are invited to a webinar hosted by Aprima to see for yourself how the new portal features will benefit both you and your patients.

If you haven't seen the Aprima Portal, this is a webinar you won't want to miss. And if you have already seen the portal, you'll definitely want to see what's new – and there's quite a bit!

Some of the key enhancements that will be covered in the webinar are:

Learn how adapting the portal can help you achieve [Meaningful Use](#).

Meeting Meaningful Use Stage 1 and collecting those stimulus dollars requires that you

- Provide patients with timely electronic access to their complete medical record
- Provide patients with an electronic copy of their health information – including diagnostic test results, problem list, medication lists, allergies
- Provide clinical summaries to 50% of all patients

All of these requirements can be met by implementing the Aprima Patient Portal

See how the portal can improve patient satisfaction by giving them *controlled* access to their personal information 24/7.

Watch as our experts show you how the portal can reduce your staff's workload and create greater efficiencies in your practice.
